

## **Gaze into Space**

**What kind of signs do you read?  
Do you believe the stars are leading your feet  
every step of your ways, do you know a sacred place?  
Are you sure that everything you do is fixed in fate?**

## **Gaze into Space**

**When you feel lost there is comfort in the bars  
Or you change your outside and look like a movie star  
But still that restless feeling is covering your soul  
All these useless trying has left a big black hole**

**Oh oh oh oh....**

**Carry me to the sky, take me high so I can fly  
then I can remember how nice it was to be down there  
Like a stone I will fall down into this big blue ball  
Now I know what I am and that I never ever have to**

## **Gaze into Space**

**Your fate is neither lying in a star or bar  
nor in the hands of someone else - its just on you  
So move your mind and guts  
and build your life as you desire  
Thats what it is and nothing more**

**Oh oh oh oh....**
